

Read EKGs and receive reimbursements.
We do everything else.

Are you getting paid less than what it's worth to over-read your EKGs? Is your staff sending out bills at the same pace that you conduct over-reads?

Obtaining EKG reimbursements can be tedious because of the large number of claims and the small payments per claim. Direct integration and automation allows us to match your pace and submit claims in bulk on behalf of your cardiologists.

Cardiologists can focus on reading and interpreting EKGs which leads to:

- **greater efficiency** with a streamlined entry process
- **seamless workflows** between bills, the clearing house, and payers
- **maximum reimbursement**

Frustrated with your EKG over-reads? Don't have time to wade through thousands of pieces of EKG correspondence? Dust off those EKG interpretations and get PAID!
